DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-68, drawn to portable information terminal equipment with connection section for connect the two units with each other for relative movement, classified in class 455, subclass 575.4.
- II. Claims 69-92, drawn to portable information terminal equipment with upper and lower units coupled to one another by a hinge unit, classified in class 455, subclass 575.3.

This application **also contains claims** directed to the following patentably **distinct species** of the claimed invention:

Claims 12, 13 contains a setting interface for registering user settings with respect to the sender information, received message information and the relative positions of the two units, wherein the controller controls the connecting section driving mechanism in a manner so as to change the relative positions of the units when receiving a call or a message based on the user settings.

Claims 20, 21 contains wherein the two units repeatedly open/ close at prescribed intervals under the control of the controller.

Claims 20, 21 contains a battery state detector for detecting whether or not a battery, which is a power supply for driving the equipment, is being charged and/ or the wherein the controller controls the connecting section driving mechanism based on the

result of the detection by the battery state remaining amount of charge in the battery detector.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 5, 6, 9, 16, 17, 23, 24, 33, 33, 71, 72, 73, 74, 77 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
